

In Your Area Installation Deployment Across Germany

No matter where your company is located - ARCTOS is near you. From Sörup, the installation deployment of technicians distributed across Germany is coordinated.

The technicians, with several years of practical experience, work as refrigeration system master craftsmen or service technicians. They carry out maintenance and repair of your cooling systems, compressor overhauls, and repairs according to manufacturer specifications.

Our technicians are capable of supporting you regardless of the compressor manufacturer or system builder, throughout Germany and beyond.

Customer satisfaction is a top priority for ARCTOS. For this reason, work is carried out in mutual consultation to avoid production disruptions and failures of your systems.

For your [safety](#) and the safety of our technicians, ARCTOS has voluntarily been certified according to [SCC**](#) based on the occupational safety manual of ARCTOS Industrial Cooling AG.

SCC** ensures compliance with an international standard for safety, health, and environmental protection for technical service providers.

Through ARCTOS Maintenance GmbH, we also offer the possibility of **employee leasing** for highly qualified industrial refrigeration masters and technicians.

We carry out [maintenance and repairs](#). For this, wear parts are inspected and replaced if necessary, systems are checked for tightness and corrosion, heat exchangers are cleaned, and your system is restored to the latest technology standards.

ARCTOS INSTALLATION DEPLOYMENT

- Maintenance and repairs
- Sale of spare parts and operating materials
- Compressor service in our own compressor workshop and on-site
- All employees are SCC** trained
- Certified operation according to WHG with implementation based on AwSV and our own quality management system
- Training in the safe handling of ammonia
- Support for inspections on refrigeration systems (operator obligation)
 - Annual inspection
 - Recurring inspection

MAINTENANCE CONTRACT

Entering into a maintenance contract ensures the timely execution of maintenance within a previously agreed cost framework. However, individual requests for technician work are also possible at any time.

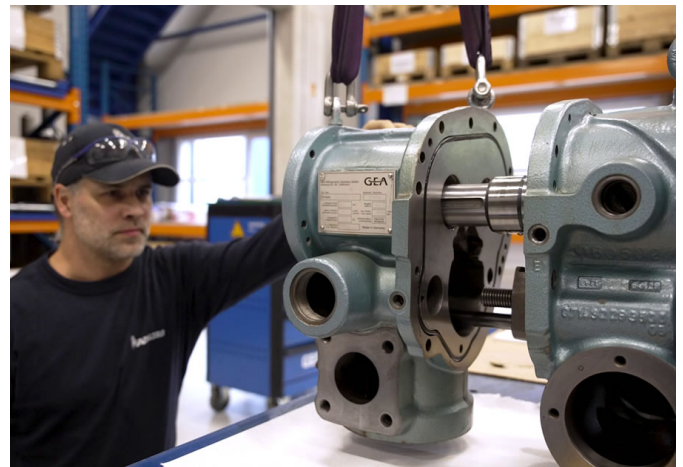

SPARE PARTS

Through the service, the procurement and delivery of [spare parts](#) for maintenance, repairs, and system modifications are planned and organized. The procurement of operating materials, such as refrigerants, refrigeration oils, and cooling carrier fluids, is also part of our responsibilities, including proper disposal.

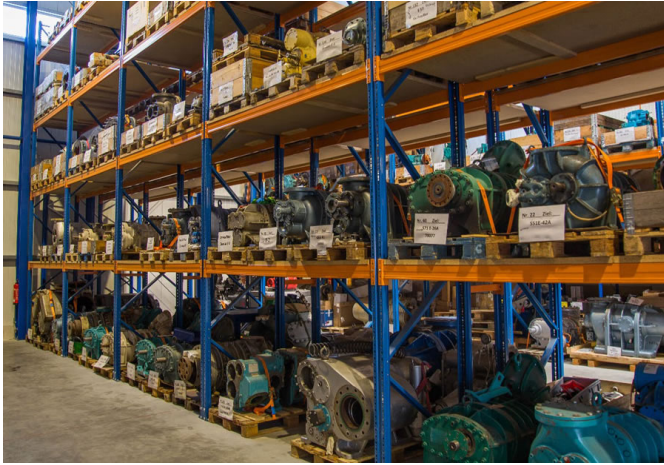

COMPRESSOR WORKSHOP

In addition to nationwide on-site service, ARCTOS offers the repair of piston and screw compressor drive units from renowned compressor manufacturers in our [compressor workshop at our Hamburg \(Braak\) location](#).

Compressor repairs are carried out by qualified specialists. You benefit from the extensive experience of our staff and their detailed knowledge of various brands.

OTHER AREAS OF RESPONSIBILITY OF ARCTOS

Quote preparation, calculation, and damage analysis are, of course, included alongside the actual repairs.

A large stock of factory-overhauled compressor stages is also available for engine replacements.

Additionally, we conduct the [required inspections](#) on your systems, offer [employee training](#), and ensure the security of your production with backup cooling systems during rebuilds, breakdowns, and production peaks.
